

GetOSVersion

Writes the OS version of the CPU to a connected string object.

Interfaces

Servers

ClassSvr	Serves as an interface for other classes to call the global methods of this class. Additionally writing to this server calls the method OCVersion() of this class.
----------	--

Clients

cOSVersion	Connection to a string object to write the OS version to the string RAM.
cAsciiBin	Connection to an object of the class TCPCommunication

Global Methods

OSVersion	Converts the OS version to a ASCII string and writes it to the connected string object.
